# lottery

# About lottery

Donation Platforms exist as a consequence of a whole slew of unfortunate events that require people to come together and aid those in need. Decentralized equivalent of Donation platforms is a perfect fit for a safe and transparent way to ensure that what you are donating reaches its destination.

Lottery is a Donation Platform that gamefies and revamps traditional ideas of donations!

## Problem

It's no secret that the number of donations is dropping rapidly.

## Solution

That's why we offer an old fundraising mechanic in a fresh new form. Now there are already auctions where trophies are sold, but not everyone has the opportunity to spend large sums to compete in them. So, we offer an opportunity to win the lot. You can get a chance by buying just one ticket.
